# GLOBAL TECHNOLOGY EXPERT SAYS – HE CAN MAKE AMERICAN ELECTIONS ONLINE IN A FAIR, SECURE, AND CONVENIENT FASHION + plus more...

Making claims of inventing a secure online US voting system may sound farfetched to most, but coming from a guy who has already singlehandedly altered entire industries, he needs to be taken seriously.

[Michael J. Freeman](#) is an undisputed technological [genius](#). Among his many technological accomplishments, Dr. Freeman is the very man who created touch-tone phone branching as we know it today (Kiplinger's), the core technology that made computers speak (TIME Magazine) smart-toys (Playthings Magazine) and the list goes on and on. Freeman sees (and seizes) technological trends better than anyone. Freeman holds many commercially licensed patents, is a noted expert in artificial intelligence, and the field of robotics.

You have never heard of Freeman because he keeps the lowest profile possible for a man of his achievements but now he has a new book coming out and messages he wants to convey. So for the first time in decades he is willing to come back into the public eye.

WHY ONLINE VOTING: Dr. Freeman says it is time to bring American elections into the 21st century. Remember hanging chads from

years ago and accusations of recent cheating? The online system would eliminate any doubt and be as secure as your bank account. Many respected studies show that more than half of Americans do not trust U.S. elections. This is
