

In Freeman's new upcoming book, he talks not only about online voting but how the newest and most advanced technologies can help solve many of America's problems. For example, Dr. Freeman has a way to separate kids from the proven psychological ravages of internet porn. Porn needs to be moved to its own domain classification away from kids. Just as we have .com .gov and .edu, porn needs to be segmented also and become .PRN. This plus the application of AI (Artificial Intelligence), use of better parental software, and use of a computer's MAC (media access control) address, can turn the tide and keep kids from accessing porn. Teenage boys are addicted to porn (for hours a day) and porn devastates the reputation of females and portrays them as lowlifes. No woman should allow this to be happening "in plain sight." Porn also harms guys because it creates expectations reality will never match! Porn is not just sex anymore. Today porn includes depraved violence, underage participants, and use of pets in a sexual manner, and many types of brutal and borderline illegal behaviors. If you do not believe me search of few sexually disgusting terms into your browser. But I have a warning for you. There will be NO WARNING. Now think of kids seeing this anytime day or night?

Sadly porn today means anyone (degenerates included) can create it, nobody gets to vet it, and yet such material has direct access to teenage gray matter. This is absurd and must change. Kids must be (as they once were) a protected class not an exploited one! And Worse yet, Porn is the actual *witnessing* of an invent. *Witnessing* is much more impactful on the psyche than watching the same pretend behaviors on TV, movies, or video games. Freeman says porn and youths must be separated NOW.
